

DEVELOPMENT DATA PLATFORM (DDP) is a platform created to leverage the power of data to optimise processes and program operations for social impact organisations.

Helps organisations

- Optimise internal processes
- Meet donor reporting requirements
- Better target and keep their beneficiaries engaged

Aims to provide a

- Low maintenance
- Low cost
- SaaS data platform

Composed of open source software elements to

- Tackle data input
- Data quality
- Transformation (cleaning, aggregation, etc)
- Governance

It mirrors a modern data stack found in the private sector, while specialising in integration tools and is tailored to needs and goals of the development space.
